

Drum Decorative Round

Drum Series
decorative backlit luminaire

Drum

Explore the System

We've given new life to a classic design - Drum has been engineered with state of the art LED technology bringing this timeless design into the 21st century. A visually stunning element, Drum is available as surface mount direct (4" tall) or pendant mount direct/indirect (5" tall) luminaire. Drum can be configured to any level of lumen output ranging from accent lighting to being the primary light source in a space. A discrete indirect light engine sets Drum apart from competitors by offering individual control of indirect and direct illumination tasks, enabling Drum to be specified as a low-glare light source while still providing adequate illumination in any space.

Beauty and Braun

Drum can be configured as an 18", 24", 36", or 48" diameter luminaire and offers a wide range of lumen outputs up to 10,000 lumens (24") or nearly 25,000 lumens (36"). Surface mount Drums can attach to ceiling or walls for dramatic effect. Pendant mount Drums can be specified with a single center stem mount or adjustable conical cable suspension for almost unlimited flexibility during design or installation.
