

Wedge Bidirectional Linear

Wedge Series
linear suspended luminaire

Wedge

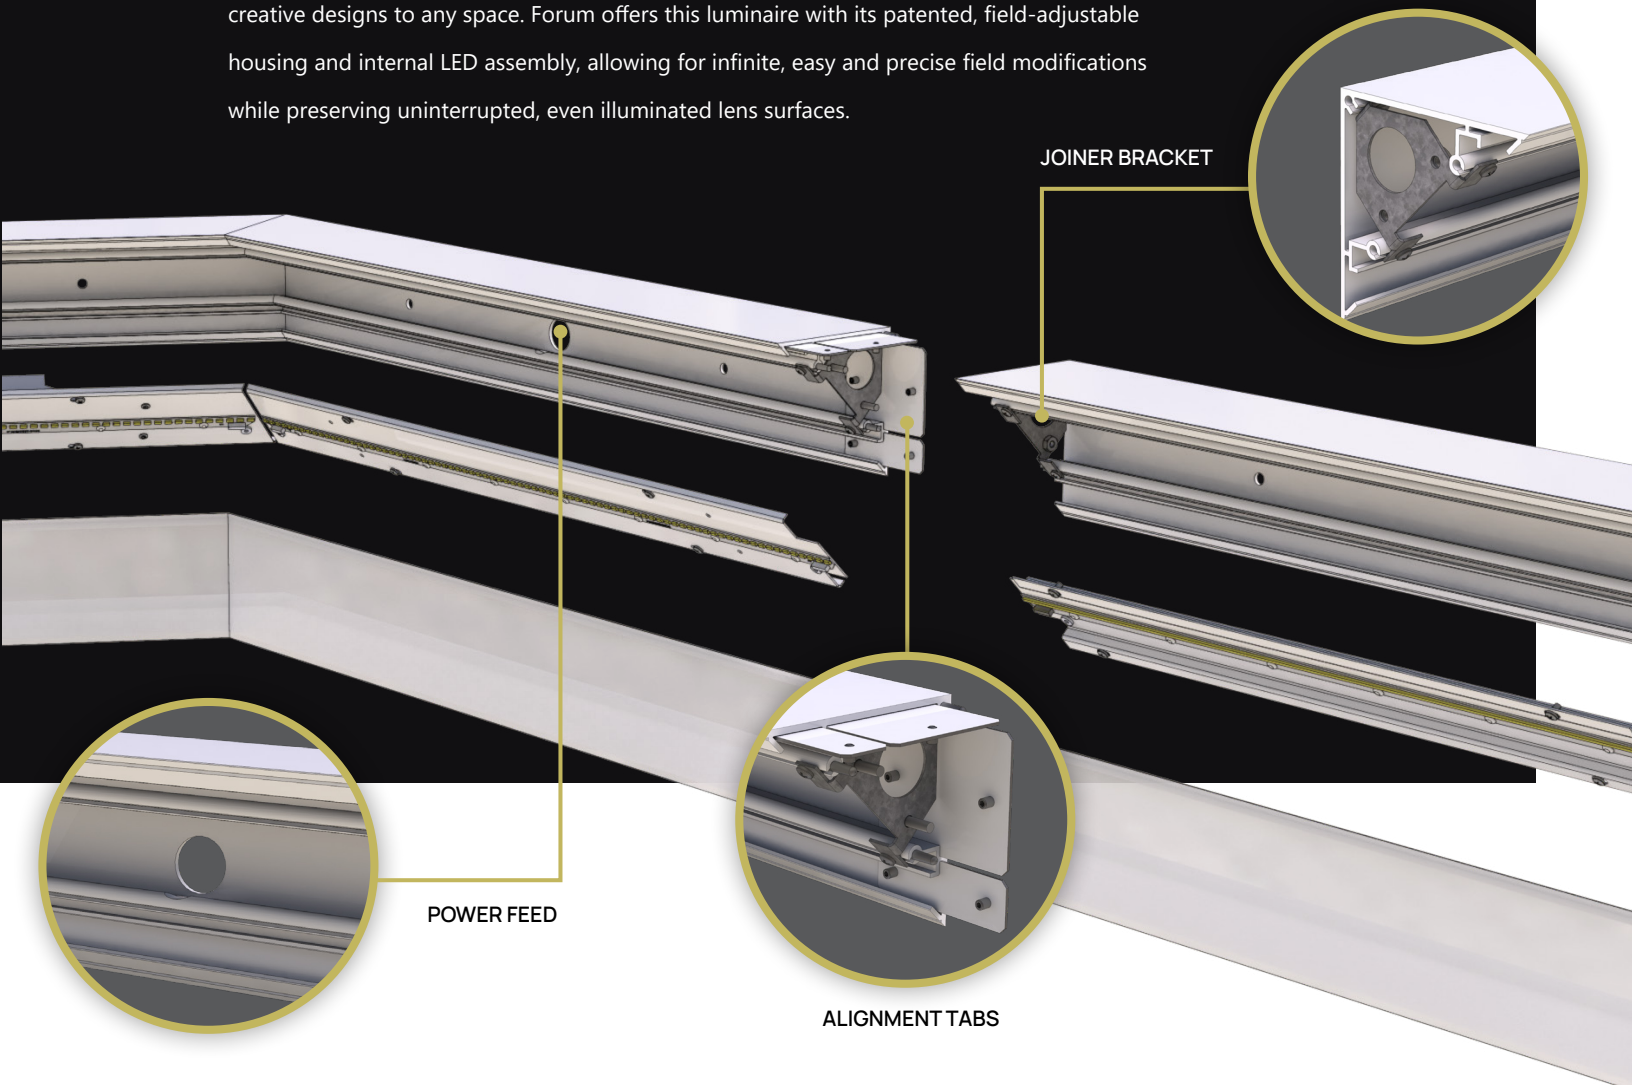

Explore the System

Wedge transforms the notion of a luminaire into an architectural feature. The unique bidirectional, 90-degree white opal lens provides illumination on multiple planes while acting as a dynamic and visually striking visual accent. Wedge can run along any perpendicular transition, providing even illumination among architectural features.

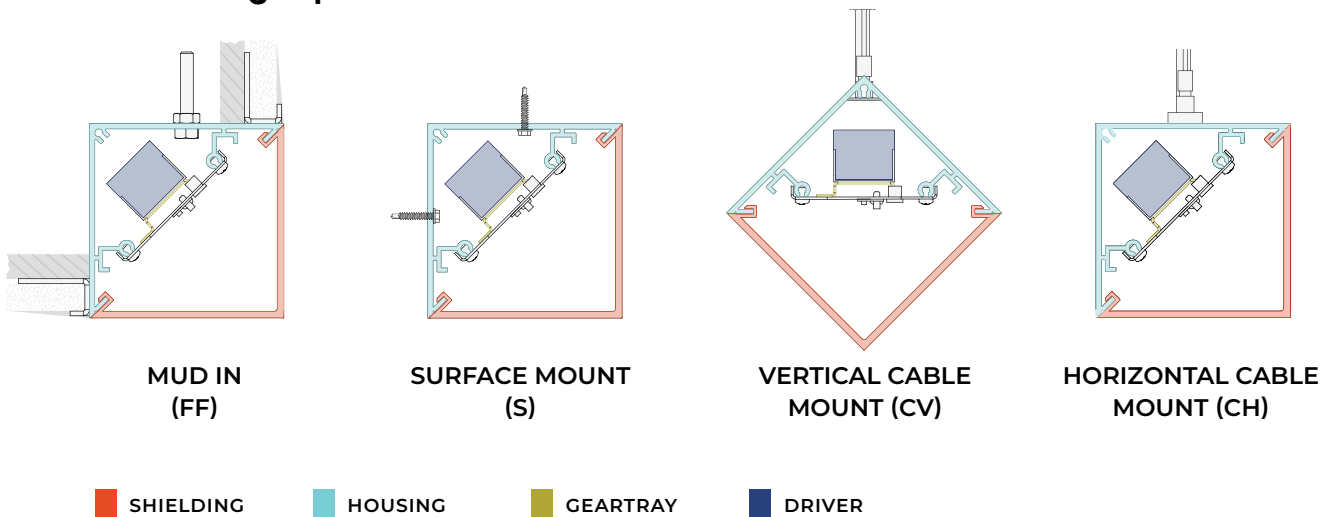

Forum offers this fixture with a variety of mounting options to work for any project. Available as a long continuous fixture or a pattern with illuminated corners, the Wedge can be surface mounted at the transition of two perpendicular surfaces or cable hung in a rectangular orientation.

Architecture Meets Illumination

The Wedge fixture can provide a quiet wall wash or illuminate any corner feature to provide creative designs to any space. Forum offers this luminaire with its patented, field-adjustable housing and internal LED assembly, allowing for infinite, easy and precise field modifications while preserving uninterrupted, even illuminated lens surfaces.
