PATTERN WORKSHEET

Please use this worksheet to specify your continuous run SRT or SRZ patterns. Please use the next page for all PER patterns.

Horizontal Corners

When your run includes only a horizontal or vertical plane, you can use the Horizontal Corners (HC).*

Multi-plane Transition Corners

Multi-plane transition corners can include Inside and Outside Transitions (IT, OT).*

Wall-to-Ceiling Transitions Corners

When your run crosses from a horizontal ceiling to vertical wall, you must use the Inside Transition (IT).*

Example Pattern

OT = 1 HC = 4 IT = 4 Linear Run = 69'

* Please provide drawings, architectural drawings, or renderings of your pattern/room as well.

Please use the grid below to plan out your linear footage and number of needed corners:

OT = HC = IT = Linear Run =

* 90 degree standard

Please use this worksheet to specify all PER patterns. Please use the previous page for your continuous run SRT or SRZ patterns.

Perimeter corners can include
Inside and Outside (IC, OC).*

Inside

Outside

The diagram shows a U-shaped wall layout on a grid. The top horizontal segment is labeled 20'. The left vertical segment is labeled 15'. The right vertical segment is labeled 15'. The bottom-left horizontal segment is labeled 15'. The bottom-right horizontal segment is labeled 15'. The corners are labeled (iC) at the top-left and top-right, and (oC) at the bottom-left and bottom-right.

OC = 2 IC = 2 Linear Run = 80'

* Please provide drawings, architectural drawings, or renderings of your pattern/room as well.

Please use the grid below to plan out your linear footage and number of needed corners:

CEILING GRID

Use the guide below to determine the proper ceiling grid placement for installation of the FG/TG and BG profiles.

**SRT, SRT REC, SRT ASY
FG/TG**

$$\text{Grid width} = x'' + 7/8''$$

Use the width (x) provided in the charts on pages 5–7 of this document, and add 7/8".

**SRT, SRT REC, SRT ASY
BG**

$$\text{Grid width} = x'' + 5/8''$$

Use the width (x) provided in the charts on pages 5–7 of this document, and add 5/8".

**SRZ, SRZ ASY, SRZ REC
FG/TG**

For the SRZ profiles, the ceiling grid width is the next highest whole number in relation to x:
SRZ-44 ceiling grid width: = 4"
SRZ-46 ceiling grid width: = 6"

**SRZ, SRZ ASY, SRZ REC
BG**

For the SRZ profiles, the ceiling grid width is the next highest whole number in relation to x:
SRZ-44 ceiling grid width: = 4"
SRZ-46 ceiling grid width: = 6"

Components and Assembly

JOINING HARDWARE

Alignment pins engage the housing profile of the adjoining units. Gasket strips along the exposed faces ensure a true fit and prevent light leak.

Supplied hardware draws the pieces together tightly.

LENS DETAIL

Snap-in Method

For Snap-in Lenses, gently squeeze the sides (1) while lifting into place (2). Lens will snap into position.

Lift-and-Shift Method

For Lift-and-Shift Lenses (used on Regressed, Perimeter, and Asymmetrical fixtures), lift lens into housing (1), rest on point A, then lower into place (2).
